

Lorries Tilt Car Transporter PL 27-4521 with ramps GVW 2700kg

Product price:

4,284.00 €

Product short description:

Internal dimension (cm): **450 x 210**

Product description:

The PL series of flatbed trailers is characterised by a rigid and robust construction of the transport frame, guaranteeing long life and trouble-free operation. The frame and the drawbar of the trailer are made of closed profiles which are permanently connected (welded).

The structure of the trailer is tiltable, equipped with 2 front locks with protection and short steel invasions made of perforated sheet metal "LOHR" type. In addition, it has 2 actuators which cushion the opening and closing of the trailer when the vehicle is driven over. The standard overrun plates are made of durable 4 mm thick aluminium.

The structure is protected against corrosion with a durable layer of zinc resulting from the hot-dip galvanising process.

Standard features

2 axles braked 2x1350kg KNOTT

Wheels 195/55 R10C

Hot-dip galvanised construction

Manual winch

Rear lamp tilt system

Two cylinders for tilting the overrun frame

Stable support wheel

Aluminium railing 138 cm under floor

Gravity-tilt flatbed

External width 210cm
