

Neptun GN237 twin-axle trailer NORDICA GVW 2000 kg WELDED

Product price:

2,142.57 €

Product short description:

Internal dimensions (cm): **320 x 168 x 40**

Capacity: **1525 kg**

GVW Max: **2000 kg**

Product description:

The NORDICA series are trailers with wheels under the cargo box, so the cargo space is much larger. All sides can be opened or removed. NORDICA is an excellent solution for transporting pallets and other forklift-loaded cargo, and from all 4 sides of the trailer - not just the rear.

NORDICA has a strong steel profile in the outer edge of the platform. It protects the

floor when loading with a forklift.

All corner posts can be removed, making the trailer versatile and easy to adapt to different needs. When all the sides and posts are removed, you get a completely flat trailer for hauling bulky cargo.

The side panels are doubled in their upper half, making the sides stiffer and stronger. In addition, the Nordica is equipped with a double locking system at each corner. This is another feature of the trailer for professional and frequent use.

Standard equipment

Internal dimension: 320 x 168 x 40 cm
